ZagTech Hackathon 2026

SANAD

Accessibility Made Simple

An integrated mobile **platform** connecting people with disabilities to accessible transportation, home care, and essential services — all in one app.

April 2026

Connecting people with disabilities to the services they deserve — in one simple, powerful app.

Challenge Landscape

The Problem

People with disabilities face daily barriers with no unified solution.

Transportation Barriers

Safe, accessible transportation options are scarce and unreliable.

Medical Booking Gaps

No dedicated platforms connect users to disability-aware doctors and clinics.

Employment Scarcity

Few job opportunities are filtered or adapted for people with disabilities.

Inaccessible Information

Hotels and venues rarely disclose accessibility features upfront.

Family Dependency

Daily tasks require constant reliance on caregivers and family members.

Fragmented Services

Existing apps address one need at a time — never the full picture.

⚠ Currently, there is no unified solution that brings all these services together in a single platform.

Market Statistics & Insights

Disability Landscape in Egypt

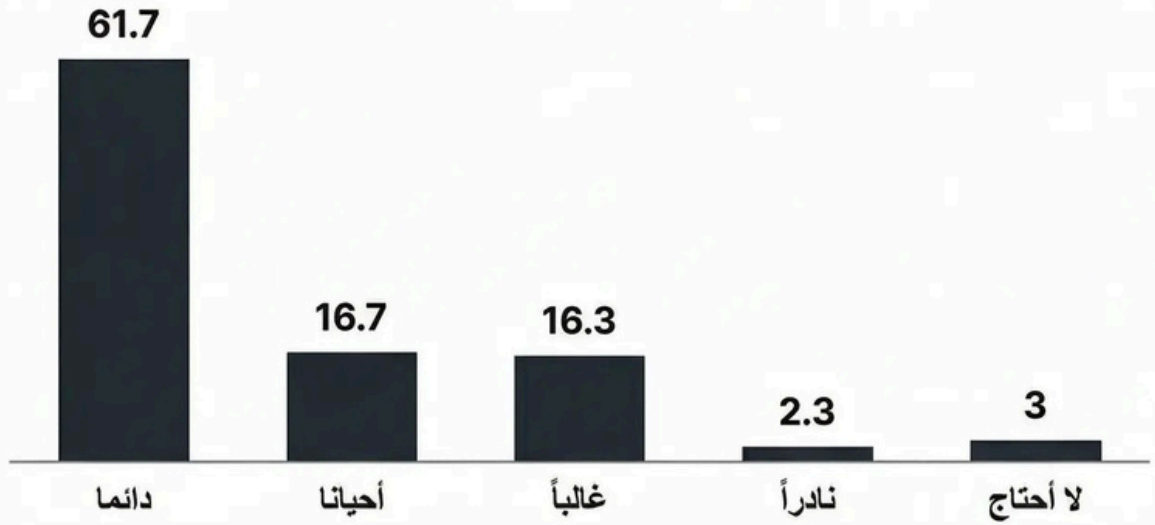

61.7%
Always require assistance with daily mobility

18M+
People with disabilities across Egypt

75%
Face barriers accessing specialized healthcare

How Oten Do People with Disabilities Need Assistance?

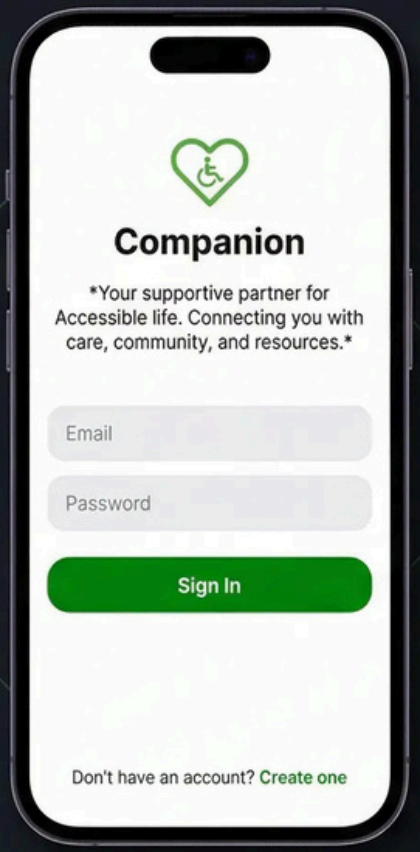

Survey of people with disabilities in Egypt

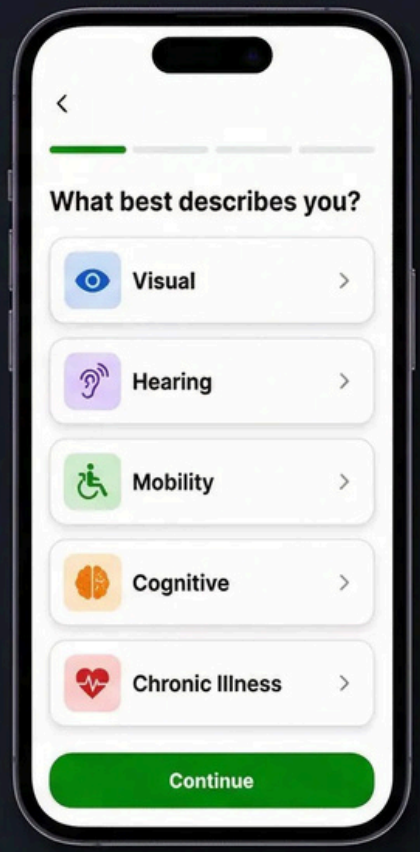

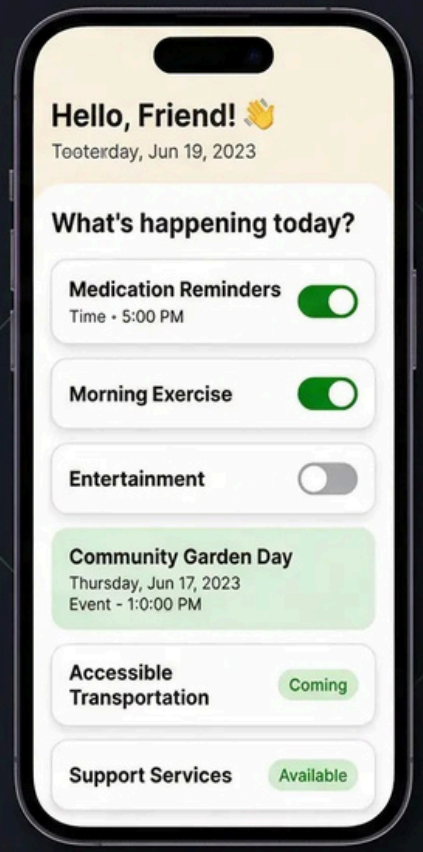

Currently, there is no unified solution that brings all these services together in a single platform.

Market Research & Gap Analysis

Service Quality

- Low accessibility standards across providers
- Lack of trained service personnel
- Poor user experience for people with disabilities

Existing Solutions

- Ride-hailing apps not disability-friendly
- Job portals lack disability-focused filtering
- Hotels offer minimal verified accessibility value

Common Prices

- Adapted vehicles cost significantly more
- Accessible hotel rooms carry a premium
- Home assistance services are expensive and unregulated

Market Gap

- No unified platform combining all services
- No verified accessibility quality guarantee
- No end-to-end service experience exists

THE GAP

No unified platform exists today that combines all accessibility services in one verified experience.

SANAD fills this gap.

Unified Platform

Accessibility First

Target Audience Segmentation

Who does SANAD serve?

01 Primary Segments

A

Physical Disabilities

Mobility, motor impairments

B

Sensory Impairments

Hearing & visual challenges

C

Families & Caregivers

**Support networks*

02 Secondary Segments

A

Hospitals & Clinics

B

Hotels & Rehab Centers

C

Inclusive Employers

D

Gov & Non-Profits

Business Model Canvas

SANAD — Accessibility Made Simple

Key Partnerships

- Medical equipment suppliers
- Hospitals & rehab centers
- Government health programs
- Technology providers

Key Activities

- Sourcing assistive products
- Customizing solutions
- ~1 in 5 users need dedicated assistive technology training
- Partnerships with suppliers

Key Resources

- 80%+ of health funds directed to people with disabilities
- Assistive devices & digital tools remain costly for users

Value Proposition

- Affordable assistive products (wheelchairs, smart devices)
- Reduces daily challenges in mobility, communication & care
- 75% of people with disabilities face barriers accessing health

Customer Relationships

- Personal assistance
- Continuous support
- 42% prefer personal support over automated systems

Channels

- Rehabilitation centers
- Online customer centers
- NGOs & hospitals
- 43% of target users are active online

Customer Segments

- People with physical disabilities
- Hearing & visual impairments
- Families & caregivers
- NGOs & rehabilitation centers
- Social welfare institutions

Cost Structure

- Platform development & maintenance
- Staff salaries & training/marketing
- Government & operational costs
- Estimated 700–1,000 per person

Revenue Streams

- Assistive devices & equipment sales
- Monthly subscriptions (premium support)
- Service fees (training & maintenance)
- Global market exceeds **$10 billion**
